

Size guide

I. Rings

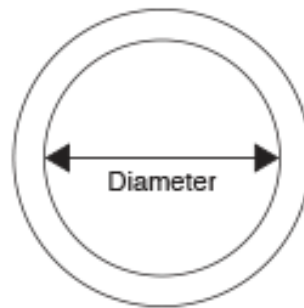

Start by choosing “scale” & 100% in the printer set up. Make sure the bar bellow is exactly 156mm to make sure you have got the correct proportions. Place a ring with your desired size on top of the diferent rings in figure A to determine your size. When the size is accurate the inner part of your ring will be alined with the ring on the paper. The second option is to measure the inner space on your ring with the desired size shown on figure B. Measurements for rings are in mm.

A

B

2. Bracelets (Only for models that can be opened and closed)

Start by choosing “scale” & 100% in the printer set up. Make sure the bar above is exactly 155mm to make sure you have got the correct proportions. Cut this measuringtape and wrap around your arm to measure where it has a comfortable yet not to loose fit. The line after the number equals that size. Measurements for bracelets are in cm.
